

## USEFUL & IMPORTANT TIPS

For a correct usage of the slush machine please follow the following tips :

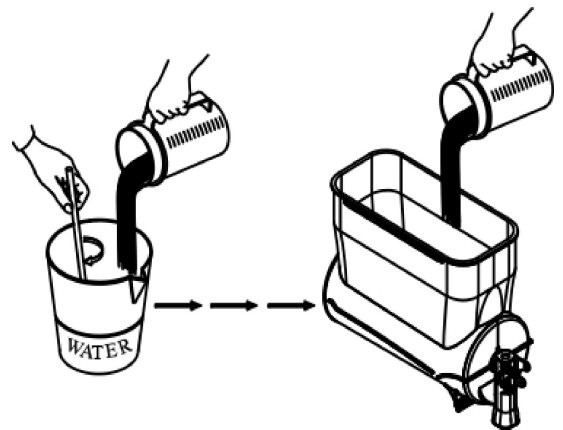

1. Remember that the performance of the slush machine are closely connected to a right preparation product
2. It is always strongly suggested to use only products/concentrates specifically manufacturer for slush production (liquid or powder)

### Preparation of the product

When possible pre-chill the product, so that the time needed to have the granita ready to be served will be shorter.

In case of concentrate product, in order to obtain a homogeneous mix, is needed to pre mix in a separate container the concentrate with water according to the directives of the manufacturer of the concentrate.

In case you want to prepare the slush with your own recipe (home -made) it is essential to respect a sugar concentration of at least 13 BRIX (in the preparation. To check the sugar concentration ,use a refractometer.
